Amir Ullah Khan

Civil Engineer · Site Engineer · BIM Modeler

Hanif Town, Diyal Road, D.I. Khan, Pakistan | +92 347 0895288 | amirullah777@gmail.com | LinkedIn | Google Scholar

PROFESSIONAL SUMMARY

Civil Engineer with hands-on experience in BIM modeling, structural design workflows, and foundation QA/QC on large-scale infrastructure projects. Proficient in Revit Architecture and Revit Structure, Navisworks clash detection, ETABS and SAFE structural analysis, and Robot Structural Analysis, with practical exposure to ISO 19650 information management standards. Published researcher in structural health monitoring (Elsevier Q1, Fusion Journal) with a strong foundation in modal analysis and AI-assisted damage detection. Seeking to bring precise 3D modeling, clash detection, and structural design coordination skills to a live-project engineering environment.

PROFESSIONAL EXPERIENCE

Trainee BIM Engineer **15 Jul 2026 – 30 Sep 2026**

Gyrfalcon Design & Build Pvt. Ltd. & MH BIMElite Services | Dubai

- Modeled walls, doors, windows, columns, floors, roofs, stairs and railings in Revit; extracted schedules and sheets of Mumbai Tower B.

Site Engineer and BIM Modeler **2025 – 15 Jul 2026**

NLC (National Logistic Cell) | Dera Ismail Khan, Pakistan

- Site Engineer on a Flyover Project, handling piling, pile caps, and girder works; coordinated with Client (C&W) and Consultant (NESPAK) on site execution, WIRs, DPRs, and compliance.
- Developed precise 3D architectural and structural models in Revit to full LOD specification.
- Executed clash detection using Navisworks to proactively resolve design conflicts before construction.
- Generated and managed high-accuracy 2D construction drawings and schedules across disciplines.
- Managed project information and standardized naming conventions per ISO 19650.

QA/QC Civil Engineer **2024 – 2025**

Ammico International, Foundation Design Company | Jeddah & Madina, Saudi Arabia

- Performed QA/QC on the Jeddah Airport Sewage Plant project, including a 100m-deep diaphragm wall panel installation, DPRs, MIRs, ISO audits, and Methods of Statement.
- Conducted bentonite, Koden shape, and concrete testing to verify panel verticality and construction quality.
- Coordinated directly with clients (NWC, Rua Al Madina) and consultants (TCC, KEO) on spec compliance and issue resolution.

Civil Engineering Intern **Summer 2023**

NESPAK Peshawar (National Engineering Services Pakistan) | Design Consultancy

- Performed structural analysis and design of a four-story building, reducing material cost by 8.3%.
- Gained hands-on experience in ETABS and SAFE for structural modeling and design.

ACADEMIC PROJECT

Final Year Project: AI-Based Bridge Damage Detection **2023 – 2024**

Ghulam Ishaq Khan Institute (GIKI)

- Built an intelligent bridge damage detection tool integrating AI with FEM on a validated 3D model of the Interstate I-40 bridge.
- Simulated multiple damage scenarios to generate ML training datasets; verified detection and localization performance.
- Developed a quantitative severity-prediction model using a Modal Strain Energy-based Damage Index and a Python dashboard for real-time mode-shape processing.
- Awarded 1st place and a PEC Research Grant of 100,000 PKR.

CORE COMPETENCIES

BIM Workflows & Project Coordination, Revit Architecture & Structure, Navisworks Clash Detection, AutoCAD 2D/3D, Tekla Structures, Robot Structural Analysis, Primavera P6, ISO 19650 Information Management, QA/QC (Foundations & Ground Improvement), Structural Health Monitoring, Structural Analysis & Design, ETABS

EDUCATION

BSc Civil Engineering

GIKI · CGPA 3.38/4.0 · 2020–2024

Intermediate (Pre-Engineering)

Karnal Sher Khan Cadet College Swabi · 85.3% · 2017–2019

Secondary School Certificate

Karnal Sher Khan Cadet College Swabi · 89.45% · 2015–2017

TRAINING & CERTIFICATIONS

Design of a 15-Story Building – Udemy
Industrial Steel Warehouse Design – Udemy (STAAD Pro)
Primavera P6 & Power BI Training
Autodesk Certified Professional: Revit for Structural Design – Coursera

AWARDS & HONORS

1st Place, Final Year Project (Bridge Health Monitoring)
Dean's Honor List – 3 Semesters
Scholarship Award, GIKI
PEC Research Grant – 100,000 PKR

PUBLICATIONS

Damage Detection in Steel Bridges Using Modal Strain Energy and Improved β-Index Method – Elsevier, Results in Engineering (Q1, IF 7.9)

Integration of Modal Strain Energy-Based Damage Index and Artificial Neural Networks for Damage Severity Prediction in Single-Span Steel Bridges – Fusion Journal

TECHNICAL SKILLS

ETABS, SAP2000, SAFE, Abaqus (FEM), CSI Bridge, Python, Revit Architecture, Revit Structure, Navisworks, Tekla, AutoCAD, Primavera P6, Power BI, MS Office

Testing: Koden Shape, Bentonite, Concrete
